Education to Inspiring Achievement

Screen Printing

Print your vision: Turn design into real, marketable products

This four-year elective course introduces students to the creative and technical world of screen printing. From designing artwork to producing printed materials, students learn how to turn visual ideas into real products using both traditional and digital techniques.

The course emphasizes craftsmanship, entrepreneurship, and innovation—preparing students to produce high-quality items for artistic, commercial, and personal use.

What Students Will Learn

The course is structured to build skills from basic to advanced printing:

- Form I: Introduction to screen printing, design concepts, stencil creation, safety and tool handling.
- Form II: Textile printing (t-shirts, bags), poster and signage printing, color mixing and layering.
- Form III: Multi-color printing, production planning, branding, and designing for small business.

- Form IV: Professional quality printing, packaging, marketing, digital design tools, and client project management.

Students work with squeegees, mesh screens, fabric and paper substrates, and design tools like Illustrator, Inkscape, and Canva.

Assessment & Support

- 30% Continuous Assessment: Projects, printed product creation, teamwork and quality control.
- 70% Final National Examination (Form IV).
- Parents' Role: Encourage hands-on creativity, assist with materials, and support entrepreneurial mindset.

Career Opportunities

Graduates will have strong practical skills for further training or immediate application in areas such as:

- Screen Printer
- Textile Product Designer
- Branding & Merchandise Producer
- Small Business Owner
- Print Production Assistant
